## Your Printing Supplies

This is the time of the year when you should get your printing supplies for the season. We can supply you with all lines of Commercial Printing, such as Letter Heads, Envelopes, Bill Heads, Statements, Business Cards, or anything you may need.

Our prices are right and we guarantee satisfaction to our customers.

When You Advertise  
In The Advance

You do so with the knowledge that you are reaching the people over the whole District. Not in many years have prices been so low on a vast number of merchandise items as at present. Buyers are eager to buy when they find bargains and the seller who advertises these bargains captures the buyers.

**The Chinook Advance**

## Hail Sweeps Through District

A bad hailstorm passed through the Heathdale and Kerville districts last Friday about in completely destroying most of the crops. The storm covered an area about ten miles wide and was accompanied by a high wind and pounded the grain into the ground. In the neighborhood of thirty farmers were in the line of the storm in these districts and most of them lost 100 per cent of their crop, while the others were badly hit.

The farmers in these districts will suffer severely through this storm, as none, or very few, had insurance and the question of feed will be hard to finance.

To the south of the districts in which the hail fell, clear to the Red Deer river, a wind of hurricane force swept across the country, blowing down buildings and uprooting trees. Several barns and granaries were destroyed and one school, the Vettord school, was demolished in the wind. To the north of the hill area a heavy rain fell for about fifteen minutes and a good volume of water was a big help to crops which received the rain.

The hailstorm is reported to have travelled as far east as Sibbald, and considerable damage was done to crops.

## Initial Payment 30 Cents

The Alberta Wheat Pool will make an initial payment of 30 cents a bushel, basis No. 1 Northern at Vancouver, on deliveries from the 1931 crop, according to announcement made Monday by R. D. Purdy, general manager of the Alberta Pool.

July 15 has been set as cut off date for the 1930-31 pool, and subsequent deliveries will be taken on the 30-cent initial payment basis, this price list being subject to revision later depending on the general market situation.

First deliveries of last year's crop were paid for at the rate of 60 cents a bushel as an initial payment, subsequent reductions carrying this down to 55 and later 50 cents a bushel.

The coarse grains pool which suspended operations last season will not be operative this year.

## Mrs. Louise C. McKinney

One of Alberta's outstanding leaders in women's work was removed Friday when the death of Mrs. Louise C. McKinney occurred at her home in Claresholm after a short illness. The late Mrs. McKinney had the distinction of being the first woman to take a seat in an Empire legislative assembly, being elected to represent the constituency of Claresholm in June 1917, and taking her seat at Edmonton some months prior to the entrance of Miss Roberta MacAdams, who was elected as an overseas member of the provincial assembly. Mrs. McKinney was president of the Dominion W.C.T.U., an organization in which she took a leading part for more than 25 years. She was one of the five Alberta women who appealed to the Privy Council for the right of women to a seat in the Senate of Canada.

A group of people gathered at the Hudson's Bay grove last Sunday to spend the day. The games enjoyed were tennis, softball and horseshoe, after which a dainty lunch was served.

There will be a ball game at the river next Sunday. Kinmundy and Atlee and Jenner are playing.

A considerable lot of damage

## Fair Director Explains

The Editor, Chinook Advance, in the last issue of our paper, re-cancellation of the Fair for this year, the reason given will perhaps create a wrong impression. The directors themselves regret having to take this step and after discussing it from every aspect decided it would be in the best interest of the society to abandon the fair for this year. At no time in the history of the Agricultural Society has the membership been so small and the financial position of the farmers and residents so acute. The funds to pay the prize money are derived from the membership fees and the gate receipts, with the government grant, which is based on the money received from these sources, it has always proved that during a poor crop year the money paid out for prizes is very much in excess of that paid during good crop years, and with a possibility of bad weather on the day of the fair would so cripple the society financially that it would no doubt mean its disbandment. In view of these facts the majority of the directors thought it would be better to endeavor to start the 1932 fair without indebtedness and with an increase of membership and the co-operation of residents of both Chinook and district,

make the 1932 fair a success.

S. W. Warren,  
**M.D. Sounding Creek**

All members of Sounding Creek municipal council were present at the regular meeting of the council which was held on Saturday afternoon, July 4.

Hiring of a road foreman for the gravel work came up, but on motion of Mr. Synnuck this was left in the hands of the committee. Curtailment of relief came up and it was decided to reduce the allowance being made to Miss Furnish, Chinook, to \$10 per month.

Atlin school district wrote the council with regard to the operation of the school, and on motion of Mr. Thomas it was agreed that no levy be made for school taxes in that district this year.

A caveat placed in error on land used as a right-of-way on the N.R. track on the south east of 35 29 9, amounting to 4 36 acres, was withdrawn on motion of Mr. Cameron.

Cheques issued by the receiver and secretary were authorized and bills totalling \$2,620.85, mostly for road work, were ordered paid. The financial statement of the secretary was also approved.

The next meeting of the council will be held on August 8.

## Kinmundy Items

A big ball game was played by Atlee and Kinmundy on Sunday, of which Kinmundy was the winner, the score being 7 to 11.

Mrs. Ed Donaldson and baby and L. Pound were dinner guests at the P. Seeger home Sunday.

A number of people from the Reaville district were picnicing at the Red Deer river Sunday.

There will be a ball game at the river next Sunday. Kinmundy and Atlee and Jenner are playing.

A considerable lot of damage was done by the windstorm last Friday. A number of buildings were destroyed. The roof was taken from the barn at Kinmundy. George Serger had a number of buildings destroyed on his farm. Geo. Hocknell's barn was also blown down.

Miss J. Seaman visited at the home of Mr. and Mrs. A. Spreeman Sunday last.

## CHINOOK MEAT MARKET

## Collholme Collections

The U.F.A. picnic held at Forker's grove last Saturday was a great success. The day was ideal and a large crowd was present.

During the afternoon the crowd was entertained by a good show of softball. The first game was between Keystone and Cloverleaf.

This was a close contest all the way through, but Keystone took the honors by a safe margin, in the last inning. The second game was between Keystone and Laughlin.

Although not as good a game as the first, many good plays were displayed. The three innings after supper gave Keystone a large majority in runs. Meanwhile the older folks listened to the speakers of the afternoon.

Messrs Marcy and Stewart. A boy unloading the trucks and cars, erecting the tents and building their fires. Mr. and Mrs. Turnbull and family, Mr. and Mrs. Savage and family, Mr. and Mrs. Falkner and family and Miss Tobin, all of Cando district, and E. B. Allen and family, of Heathdale, accompanied or rather transported the boys to Steveville and spent the rest of the day in a group apart from the boys.

A hail storm passed over the Heathdale district last Friday noon, causing havoc in its path. Further south and right to the river it was only a wind, but with such hurricane force one farmer had all his buildings demolished except his house. Vettord school disappeared in the wind.

## Lessons Of The Depression

During periods of depression such as the world is at present experiencing the almost universal tendency is to look upon the gloomy side of things to the exclusion of everything that is hopeful and encouraging. As a result there has been a plethora of dire forebodings, headshakings, and pessimistic utterances, accompanied by an arid scarcity of optimism and hopefulness. People generally can see, and see things continually dived up, the darkness, the losses, everything that is bad in the present situation, but it is rare indeed, to discover any one who finds something good, or prophetic of future good, arising out of existing conditions.

Yet nothing is wholly bad and there may, and often does, develop out of the most adverse circumstances some of the best and finest things of life.

We have observed, for example, a larger sympathy on the part of the average person for their less fortunate fellow-citizens than has been noticeable for a long time. Fewer people are inclined to turn a deaf ear to stories of distress, or to appeals for help. The man out of work is not, as a rule, ruthlessly turned away but is received kindly and sympathetically even though it may not be possible to do much or anything for him. Thousands who have little to spare are nevertheless dividing that little with those who have nothing. There is, we believe, less hardness and more sympathy in our relations one with another as a result of an appreciation of existing conditions and problems. The development of such a feeling is so much gain.

It is also true, or at least we are inclined so to believe, that many people are beginning to realize the true inwardness of life—that work, about which in times past they have been inclined to grumble and regard with distaste and as something they would like to avoid, is, after all, one of the greatest blessings conferred upon man by the all-wise Creator of the universe. Today, employment, the opportunity to work, is regarded by nearly everybody as one of the greatest boons which can obtain. Idleness is not a luxury, is not to be desired; it is a heartbreak, a calamity. The impelling necessity to work has been found to be not a hard taskmaster, but a kindly benefactor. The hardest work of all is not to be able to work.

Another much needed lesson which some of us are learning is how puny mere man is after all. In days of prosperity and mighty mechanical achievement and progress, there was a growing inclination to regard ourselves as self-sufficient, as supermen, boastful and vain. And this individualistic self-sufficiency was reflected in national self-sufficiency. We could live unto ourselves alone, as least so we thought, order our own lives, and disregard the rest of the world. But we have discovered we are not supermen, nor gods. The rains cease to fall, blighting winds blow and intense heat prevails, and mere man finds himself helpless. He can do nothing. His accumulated savings are soon eaten up. He is in distress, and his condition of distress reacts upon other people and nations thousands of miles away, just as their difficulties and losses react upon him. One suffers; all suffer. Mankind is a brotherhood, and there is one ruling Power over all. These are truths which cannot be denied or ignored.

## Prodigy Finishes Up At Adding Machine

### Brooklyn Boy Stumps After Unusually Brilliant Start

This is the time of year when the college graduate goes forth to conquer the world. And yet—William J. Sidis at the age of six months knew the alphabet. When he was but two years old he could read and write with ease, spell correctly and carry on an intelligent conversation. By the time he was four had mastered four languages. At six years of age he completed an entire eight-year grammar school course in six months, and two years later he was graduated from the Brooklyn High School after completing the four-year course in half a year. Entering Harvard University at the age of 11, he was graduated with honors four years later. Sidis then took post-graduate work and became a teacher of mathematics. This boy wonder—says John Hix, in his Strange As It Seems Illustrations—was discovered five years later running an adding machine in a New York store.

### Reduction In Colds

A ten per cent. reduction in frequency of colds among a group of 14 Cornell women students is the latest record of using scientific knowledge. Seventy-five Cornell men taking the same treatment showed a reduction of 42 per cent. The cold protection is ultra-violet light, alkali, diet, ventilation and sleep.

Comic Artist: "This joke ought to be good, I've had it in my head for ten years."

Heartless Editor: "Sort of aged in the wood, as it were."

Hotel Clerk (writing a form): "Name please?"

Guest: "Tammies MacTavish Mac-Haggis."

Hotel Clerk: "Nationality?"

## Could Not Check the Summer Complaint A Few Doses Did It

Mrs. R. Coulter, 918-11th Ave. E., Calgary, Alta., writes:—"Last summer my youngest son was very bad with summer complaint, and everything he ate he would vomit, and he got so thin I became very much worried. I could not get the discharges checked, so I went to Dr. Fowlie's office with him and told me it would stop the trouble if anything would. After I had given the boy the first few doses I noticed the discharges were being checked, and it was not long before he was well again."

Drought Decimates Ducks

### Dry Year Takes Heavy Toll Of Young Broods

The death rate among young wild ducks in Saskatchewan this year, owing to the drought, has been extremely heavy, was the opinion expressed recently at a special meeting called between members of the Saskatoon Fish and Game Protective Association, Arthur Etter, game guardian, of Saskatoon, and Dr. W. B. Bell, of the Bureau of Biological Survey, Washington, D.C.

The extreme seriousness of the situation could not be stressed too much, was the unanimous opinion, and the sportsmen want the shooting season greatly curtailed if the United States will do likewise.

Dr. Bell said he had come to Saskatchewan because of the alarming reports received by his department. The department had not been sure that the reports had not been exaggerated and had decided to investigate for itself. "And I can assure you," declared Dr. Bell, "the reports have not been exaggerated. Mr. Etter and I have just finished a 500-mile trip and have counted exactly 400 ducks and of this number only 24 were young ones. On one lake we counted 300 ducks and there were no young ones amongst them. We believe that the adult ducks had gathered after their broods on a number of small sloughs had died owing to the drought."

Mr. Etter stressed that the trip had been a very thorough one from the duck investigation standpoint. At every point touched very full enquiries had been made among sportsmen and farmers and they had declared that the death rate had been extremely heavy. It was doubtful if one per cent of the young duck population in a great portion of the province had survived the drought.

### Canadian Mines Pay Dividends

#### Several British Columbia Companies Distribute Substantial Sums

All mines are not just holes in the ground into which miners drop their money. Despite talk of hard times and low-priced metal markets, Canadian miners are still paying steady dividends.

Several British Columbia companies are to pay out their usual quarterly dividends. Some of them amount to quite substantial sums.

Pioneer Gold will pay out over \$2,000,000.

Premier Gold will pay out \$150,000. Howe Sound (which operates the Britannia Mine) will pay out \$240,000.

Consolidated Mining and Smelting (which operates the Sullivan Mine and the Trill Smelter) will pay out \$92,000.

Sir Donald Mann tells us of declining to buy the Sullivan when it was offered to him by the original tow-headed Sullivan for \$12,000. Since then it has had spells of good luck when lead and zinc were high, when it made \$60,000 a day.

The day may not be very far distant, when the great pre-Cambrian shield which blankets northern Saskatchewan, will be supporting big mines and paying out millions in quarterly dividends.—Regina Daily Star.

**All Night With Asthma.** Everyone knows how attacks of asthma often strike at night, and how they last for hours, sometimes all night long. Morning finds him wholly united for a day of business, and yet business must still be carried through. All that night suffering need not remain unrelieved, however, by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which promptly drives away the attacks.

### Bible Weighs Half A Ton

#### Los Angeles Carpenter Has Completed Largest Copy In World

For two years Louis Waynayal, a Los Angeles carpenter, has been working day and night to make the largest Bible in the world. Now he has completed his task. Using a hand-stamping machine, Waynayal stamped on to the 375 pages of his giant book every single letter, symbol, and punctuation mark, taking his family Bible as a pattern. The book contains 8,048 pages and weighs 1,094 pounds, and it spreads to a width of eight feet and two inches.

### Made Poor Guess

"The place will never amount to a hill of beans." This was the prediction of Sergeant Joseph Herbert 65 years ago to Winnipeg's future. He gave away the land the Crown granted him, and marched east with the Royal Canadian Rifles when that regiment was recalled to Halifax. Recently a son of the sergeant of Red River days visited the city. The parcel of land his father gave away is now the site of the City Hall.

Fuel alcohol is made from pineapple waste in a plant near Honolulu, H.I.

Empress of Britain Sets New Record  
In Mercantile Marine of Any Country

### Fastest Atlantic Crossing

Empress of Britain Sets New Record  
In Mercantile Marine of Any Country

Making the fastest trans-Atlantic crossing ever recorded by the mercantile marine of any country, the new 42,500 ton Canadian Pacific liner Empress of Britain at 3:15 a.m., Monday, June 22nd, recaptured the Blue Riband of the Atlantic for British shipping. Establishing a new world's record of four days, twelve hours and thirty minutes between Cherbourg and Father Point, mails were landed and the pilot taken on in four hours and twenty-six minutes better time than the previous record of four days, seventeen hours and six minutes made between Cherbourg and Ambrose Light where pilots are taken aboard New York bound ships. The Canadian Pacific now holds the Blue Riband on both the Atlantic and the Pacific oceans, the Empress of Japan holding the record for the run from Vancouver to Yokohama.

### B.C. Timber Resources

Industry Gives Steady Employment To 45,000 Men

Average annual revenue received by the Crown from forest sources in British Columbia during the past ten years, according to an official report, has been in excess of \$3,725,000; average value of materials produced has been more than \$80,000,000, and during this time the industry has given steady employment to about 45,000 men.

It is estimated that there are at present in British Columbia commercial stands of timber covering about 16,900,000 acres. Of the more important commercial species the amount of timber accessible for immediate future use is approximately as follows: Douglas Fir, 54,000,000; 100,000 board feet; Western Hemlock, 61,000,000 board feet; Western Red Cedar, 60,000,000 board feet; Spruce, 70,000,000,000 board feet.

### Use Empire Timber

London County Council Favors Use Of Home-Grown Articles

The use of home-grown or empire timber only in the manufacture of furniture for the London County Council provided supplies of such timber of suitable quality are obtainable at reasonable prices was recommended by the council's general purpose committee which has been studying the question of policy regarding the use of empire timber for the council's requirements.

The Canadian Chamber of Commerce in Great Britain has forwarded a resolution appreciating the decision to the council.

Douglas Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Counteracts wounds and prevents blood poisoning. Splendid for muscular rheumatism.

The reason so many people miss the road to happiness is because when they come to it looks so much like a detour they take the better-looking side.

Silence is still trying to find out when and where farming was first attempted in ancient America.

University of Manitoba, Winnipeg.

### Decrease In Forest Fires

Decided Drop In Prince Albert Distinct This Year

A decided drop in the number of forest fires in the district is very noticeable compared to last year. The number totals 60, spreading over a district including the Prince Albert area west to the Big River forest reserve and east to Nipawin. Last year at this time there were 60 fires in the Nisbet reserve alone.

A reason given for the present low average of fires is the rewards offered for information leading to the arrest and conviction of persons willfully starting fires. In addition to this, the campaign against forest fires is bringing good results, also the radio telegraph in operation enables the rangers to keep in touch with each other as to conditions.

The co-operation of the public is asked to enable the forestry officials to retain this high standard throughout the dry season when tourist traffic is general.

### Internally and Externally It Is Good

"The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For the throat, cold, when colds, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

### London Still In Lead

Population Exceeds New York By Over Million

London still is the world's largest city by a margin of more than a million inhabitants over New York.

Metropolitan London, containing the "outer ring," which corresponds to that known as Greater New York, has a population of 8,202,818, preliminary summaries of the census taken April 26 indicate. The population of Greater New York in the last United States census was 6,981,917, or 1,220,901 less than its British rival.

Horace Luck, 80, one of the last postmen who blew a bugle when delivering letters in London, England, is dead.

## Fifty Per Cent. Of Cattle Hides In Canada Last Year Were Damaged By Warble Fly Grubs

Fully half of the 1,300,000 cattle hides taken off last year in Canada to avoid open grub holes, tanners entered unmistakable evidence of counter considerable loss through damage by warble fly grubs and the greatest charge on capital tied up for value of the finished leather produced long periods, a loss which we cannot from these hides was reduced by at least \$700,000. The extent of the ad-

ditional loss in reduced milk and hides is, in addition to monetary best production cannot be determined, involved, a potential source of annoyance and ill feeling due to difference between "grubby" and "clever" hides. All Canadian hides sell for less because of the warble damage. In the British Hide Markets during 1930 a classification for warbled hides was introduced the first six months of the year, duced and as a result warbled hid-

The holes in this piece of leather were caused by the Larva of the Warble Fly

39 holes in a piece of leather only 13½ inches long.

when some tanners refuse to buy Canadian hides. In April and May, 1930, the percentage of hides that were "grubby" ran as high as 45 or 50 per cent. Dr. Graham states that more grubbed hides are found on warbled and an unwarbled animal western range stock than on other cattle and that the percentage is 10 per cent greater steers than on cows. One tanner gave his opinion that 95 per cent of Canadian hides showed the unsightly scars of present or previous infestations.

The warble fly grub, hatched out from eggs laid on the legs of cattle, work their way through the skin, thence to the gutlet and eventually out through the animal's back. They leave holes which gradually close but always result in a permanent scar which reduces the quality of the leather.

Hundreds of holes caused by grubs have been counted in a single hide. The area affected is limited to about 10 per cent of the hide, or 4 square feet, but is the best part for the production of leather. Samples of leather made from affected hides submitted to the Research Laboratories have the appearance of having been ridged by gun shot.

Losses from the warble fly have reached such proportions and remedial measures have been developed which are so satisfactory that the tanning industry through the National Research Council's Associate Committee on Leather has urged a concerted and determined effort at eradication. The Dominion Department of Agriculture is taking special action. Dr. Graham's estimate of losses incurred is being made available to this department and the other agencies concerned.

The problem of eradication is by no means insuperable is indicated by the experience of Dean A. M. Shaw at the farm of the University of Saskatchewan at Saskatoon. For some years regular treatment has been applied, with the result that at present it is stated that probably not over a dozen warble fly grubs are found annually in all the cattle. Because the warbles do not fly they can be controlled locally in comparatively small areas, although it would be considered impossible for a single small farmer to act alone in such a manner.

Farmers are recommended to seek advice as to treatment from recognized authorities.

Dr. Graham's report concludes as follows:

"How strangely they play."

"Yes. They are exhibition tancers and they practice while they play tennis."—Der Brummer, Berlin.

W. N. U. 1938

## Praise For Livestock From Saskatchewan

### If Quality Maintained Will Command Highest Prices On British Market

Excellent outlook for Saskatchewan's livestock exporting industry is seen in the tribute received by W. W. Waldron, markets commissioner of the province, from the Co-operative Wholesale Society of Great Britain.

"If Canada continues to produce and ship to England this quality, we have no doubt as to satisfactory prices; even on low value markets they would command the highest price available," the letter received by the commissioner states.

Conjecture is being voiced by Canadian cattle and livestock men as to the cause of the excellent run produced. Whether fortune entered the shipment and found Saskatchewan ready with a "good run" of stock or whether the available cheap feed has caused a liberality in feeding is a matter of concern.

A more strict interpretation of Saskatchewan's livestock breeders of export cattle is looked upon by Commissioner Waldron as the likely cause for the general good quality stock shipped.

"The last shipment of cattle received by the S.S. Manchester Citizen was about the best ever received from Canada and has done more good in two days than a whole year of poster advertising or broadcasting could ever do, the quality being far superior to any Irish and equal to any Scotch," the letter relates.

"The prices realized on the selected of this shipment were equal to our selected Norfolk cattle," it continued.

"Our markets will be favorable for another six weeks until the Irish grass fed cattle arrive, although even then your selected steers (young finished) will always be in good demand at top market prices," the letter concluded.

### Being Afraid Wastes Time

#### Hours Spent In Worrying Could Be Used To Better Advantage

J. R. Lumley, editor of the Fort William, Ont., Times-Journal, says: "Did you ever stop to think that a lot of good time is wasted over being afraid? Hardly any movement forward has ever been made without someone else spending time in worrying lest it should hurt him."

"We all know how the retail merchant has been scared almost to death of the advent of the chain store. Yet, when it has come, what a lot of merchants have simply plucked up their courage, brightened up their business methods, done a lot more good advertising and found that the chain store that had opened next door had actually helped rather than hurt them."

"The railway is afraid of the bus line, the advertising manager of the newspaper is afraid of radio. If all the time that is spent in nursing fear is devoted to studying the best methods of meeting new conditions and turning them to one's own use by co-operation, if competition won't work and by liberal use of advertising, most of the nightmares would vanish."

"I often think of the advice of the trainer, when he felt that his man was nervous about going into the ring, 'remember that the other fellow is just as scared as you are and the man who first quits being scared will score the knock-out.'

Siam is developing its automobile roads through the jungles.

The United States has about 2,000 railroads.

England has eight autogyrus.

Advised To Work Patches And Leave Clean Land Alone

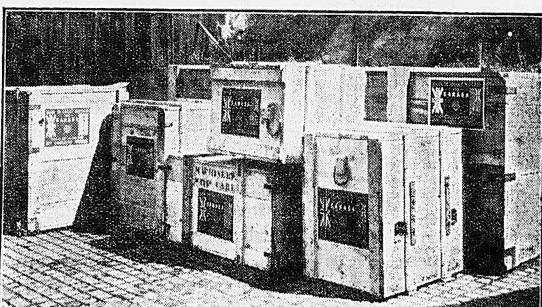

Cutworm losses in the areas affected this year will be heavier in 1932 unless exceptionally heavy rainfall occurs is the prediction of the Dominion laboratories at Lethbridge. At the same time the entomologists prophecy that areas lightly affected this year will suffer greater losses next year.

The department suggests that farmers set the worms to work clearing out Canada thistle and other weed patches by working those lands between July 25 and September 7, when the cutworm eggs are laid. Clean land should not be touched between those dates, the authorities state, as the worms work only in loose soils.

The noblest study of mankind may be man, but his favorite study is

women.

### CANADA SENT US THIS ORDER, BUY CANADIAN PRODUCE"

This interesting picture, just received from England, shows the latest campaign designed by the hard-working Empire Marketing Board to boost the products of the Dominions and Colonies in the British Isles. The photograph shows a number of huge packing cases on one of the station platforms in England containing a consignment of British steel for Canada. On the sides and tops of these cases are nailed boldly labels bearing the words "Made in Great Britain for Canada" and the words "Canada sent us this order, buy Canadian produce." This message is intended by the Empire Marketing Board to convey to all who may see it, whether at the workshops before departure, or in the course of the journey to the ports, that Canada is buying goods from the Motherland and that the people in the British Isles should reciprocate. The new scheme is meeting with an encouraging response.

## Will Visit Churchill

### Business Men Under Auspices of Canadian Chamber of Commerce To View Northern Activities

Churchill, Manitoba, once a lone trading post on Hudson Bay and now the scene of developments which will make it a great northern port, will be visited this fall by a large delegation of businessmen under the auspices of the Canadian chamber of commerce.

The chamber is completing plans for the trip which will be made just prior to its convention which will be held at Regina. On September 7 the party will leave Regina for the north, returning in five days' time after which the delegates, who will represent the 200 Canadian boards of trade and chambers of commerce from the Atlantic to the Pacific, will assemble at Regina for the annual convention.

### Management of Yukon May Be Investigated

#### Administration Is Now Being Carried On By Canada

Administration of the Yukon territory, now carried on by the Dominion, might be the subject of an investigation, Hon. T. G. Murphy, minister of the interior, said in the House of Commons. He was asked by Rt. Hon. Mackenzie King, Liberal leader, how long the Dominion would carry on the administration and bear the whole cost.

The population of the Yukon was given as 3,900, of whom 2,500 were white people. The House passed a vote of \$185,000 for the administration this year.

### Transport Minerals By Air

#### First Shipment of Radium Ore From Great Bear Lake By Airplane This Month

The transportation of mineral products by airplane may seem fantastic, but will actually be adopted in Northern Alberta. The fact that the mineral happens to be radium explains its suitability for air transportation. Plans call for an airplane trip to Great Bear Lake during the present month returning with the first shipment of radium ore, of which it is expected that area will become an important producer.

### World's Grain Exhibition

#### Space For National Exhibits Is Being Taken Up Very Rapidly

Space for national exhibits in the new World's Grain Exhibition and Conference building is being taken up very quickly, a large portion of the mill and one-half frontage for these exhibits having already been applied for. Dr. J. H. Gridale, chairman of the program committee, cultural experts representing many countries will take part in the conference program of the World's Grain Show, 1932.

### A Freashish Earthquake

There appears to have been something almost ludicrous about the earthquake that shook the Old Country. The only casualty was a canary, which suffered a broken wing, but the quake played havoc among the figures in Madame Tussaud's famous waxworks, tumbling together and smashing the images of criminals, jockeys, tennis players and less notable personages. The re-assembling of these parts will be a delicate piece of work.

Sham is developing its automobile roads through the jungles.

The United States has about 2,000 railroads.

England has eight autogyrus.

## Population Of Great Britain Largest Ever Recorded, But Birth Rate Is Much Lower

### Where Nightingales Are Considered a Nuisance

#### Inhabitants Of English Village Kept Awake By Songsters

In all the world there is no song more beautiful than that of the nightingale, but the village of Merrow in Surrey, England, is so much patronized by the songsters this year that the inhabitants are beginning to speak of their "pest of nightingales."

Indeed, visitors have heard more than one person threaten to shoot the birds—if only they could catch them.

People living in the vicinity of Merrow Common, many of them land folk whose work calls them early from bed in the morning, are those who complain most bitterly. For as many as five and six nightingales turn up simultaneously between 10 and 11 o'clock each night.

"There were two singing one against the other in an elm tree just outside my window the other night," one man said, "and the din was so loud that I thought I might get some sleep in the back bedroom. But it was no better there, because another nightingale was singing in the pear tree in my garden."—London Morning Post, England.

### Winnipeg Newspaper Union

(By Annette)

YOUTHFUL

Here is a blouse you'll love. It's not alone flattering and youthful but thoroughly wearable.

A dotted crepe silk made the original in white ground with skipper blue nickel sized dots. It's a combination that fits into many color schemes. It's a type that may be worn with a suit or with a separate contrasting skirt or made as a complete frock worn with a matching skirt.

Net, eyelet batiste and lace are, daily suggestions.

Handkerchief linen, printed batiste, dotted swiss, pastel crepe silk and satin are ideally suited to this model.

Style No. 356 may be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

The 36-inch size requires 2 yards of 39-inch material.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

—The Passing Show, London.

WORLD HAPPENINGS  
BRIEFLY TOLD

Displays of 269 firms were shown in the advertising and packing section of this year's fair at Leipzig, Germany.

The London Daily Herald says that Amy Johnson, British aviator, who made a solo flight to Australia, is now preparing for a trip across Europe and Asia to Tokyo.

Feminist leaders of the world, after a two-days' meeting, agreed on a report to assembly of the League of Nations demanding complete equality for men and women in the matter of nationality.

Mrs. C. M. Strong, affectionately known to thousands of Canadian troops overseas during the Great War, as "mother" of the 44th Battalion, died at her home in Winnipeg recently.

His first visit to civilization was too much for Otto Knudsen, Eskimo hunter of the Lauga Koch Arctic Expedition, who became violently demented when he saw his first movie at Thorshavn, Faroe Island.

Among scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

From his colleagues in the cabinet, Rt. Hon. R. B. Bennett, prime minister, was the recipient of a beautiful set of antique silver entree dishes. The gift was in recognition of his 61st birthday.

In front of the Australian commonwealth building at Canberra will be shortly erected a 200 foot flag pole of Douglas fir, the gift of the province of British Columbia to the Australian people.

Excellent progress is being made in driving the herd of Alaskan reindeer to its new quarters in the Mackenzie River district, Hon. T. G. Murphy, Minister of the Interior, told the House of Commons recently. Latest reports said the herd was about 300 miles from its destination.

## Fruit Land Taken Up

Over 50 acres of orchard and vegetable land were taken up by new settlers in the Southern Okanagan or British Columbia during the past year. Prices ranged from \$50 an acre for raw land to \$750 for improved and bearing orchard. Approximately 25,000 young fruit trees were planted.

## War Hero Dies In Theatre

General Bertrand, national hero for his spirited defence of Liege and for the Yser campaign during the Great War, dropped dead in a theatre at Brussels. He was credited with defeating the Germans for ten days at Liege while Marshal Joffre reformed the French army for the defence of Paris.

The youth who claimed that the four kinds of sheep were: white, black, sheep, Mary's little lamb, and hydraulic rams, was certainly not a true son of the soil.

## Cunard Week-End Cruises

## Something New In the Line of Ocean Travel

A pioneer steamship company for the past 91 years, the Cunard Line came to the front this year with something new in the line of ocean travel; the week-end cruise, a voyage which gives practically everyone who can afford even a short vacation a chance to go to sea and visit a foreign port.

Already thousands have visited Nassau down near the Tropic of Cancer, more than 900 miles south of New York, and the Islands of Bermuda, 600 miles off the coast of Savannah, and they made the round trip in four days. The better part of a day was spent ashore in sightseeing, golfing or sea bathing.

The schedule for the summer season calls for week-end cruises to Nova Scotia, with sufficient time to visit the many historic points in the environs of Halifax, the birthplace of Samuel Cunard, founder of the line which bears his name.

The Cunard's week-end cruises are made by the line's express steamers the "Berengaria," "Aquitania" and "Mauretania" among the largest and finest ships in the world.

These liners stream through the sea at a leisurely pace of 16 to 20 knots so that the voyager may get the full good of the bracing air and the health-giving sunshine.

To the question, "What is done on these week-end cruises?" the answer might properly be: Everything! People play the regular deck games and invent new ones of their own; they bet on the day's run of the ship, as well as upon the horse race on deck; they bathe in the indoor pool or in the huge tank on deck; they dry themselves by lying prone on the hatch tops or take sun baths in deck chairs; they loll about in bathing and various kinds of sport suits, the girls displaying many types of wide-legged pajamas; in short, they do very much as they please, and they offend no one by doing so. They have lectures, photo plays, dances and night clubs.

Good food plays a large part in the pleasure of the day, and the catering superintendent of the line goes along to make sure that there is no economy practiced on the bill of fare; that dishes are added rather than cut out.

The entire ship is first class for these week-end cruises. There is no forbidding sign anywhere. Passengers are permitted to use all the public rooms and every deck stem to stern.

These trips make a strong appeal to vacationists who go away for two or three weeks every summer. They give such people a chance to begin or close the vacation period with a sea trip and yet leave enough time for a week or two in the mountains as usual.

An interesting sight is the ceremony of dropping the pilot after passing through Ambrose Channel. This is an incident which impresses the world with observers. The pilot always leaves in a small rowboat, being picked up a hundred or two hundred yards away by the yacht-like steam tender. Soon after passing here all the land faded out of sight. The next daylight of this kind is catching the first sight of the land to which the ship is steaming. This always reminds the passengers of the thrill which came to Columbus when the first land loomed up in the West Indies.

Returning from a cruise, a great crowd moves to the rail to note the arrival of the Sandy Hook pilot, in his little rowboat, looking like a chip alongside the huge liner.

At quarantine, off the eastern shore of Staten Island in New York Bay, the port doctors come aboard and when he clears the ship the customs and immigration men board the steamer from a coast guard cutter and check up on every passenger on the ship, leaving no loop-hole for the stowaway.

This ceremony over, the ship proceeds to her pier, where many friends await the arrival of the tourists. Once on the pier, the passengers go home to tell their friends about this new idea in ocean voyaging and to urge them to book at once for a week-end tour on the wide Atlantic.

## Fruit Market In China

Fruit shippers of the Okanagan show much interest in the statement of Col. L. M. Cosgrave, Canadian Government Trade Commissioner at Shanghai, that China offers a large outlet for low grade fruit at an economical price. The subject was brought up at two meetings in Vancouver addressed by Colonel Cosgrave.

Edmonton a City Of Homes  
Eighteen hundred new homes were erected in Edmonton during the last six years, or an average of 300 new dwellings a year, it is pointed out in a special issue of the Edmonton Journal. The original cost of these homes, not including repairs and additions, figures at about \$6,000,000.

Devotional Reading: Psalm 112:5-10.

## Explanations and Comments

Sharing Possessions, Acts 4:32-35.—There was the greatest unity of feeling and purpose in the early Christians, as the proverbial expression has it, they were of one heart and one soul.

Settled on the northwestern shore of the Dead Sea, and living in scattered communities throughout Palestine at this time, the Essenes, a sect called "the Therapeutae" who met in a large hall in the desert, had all things common. Each one deposited whatever he possessed in a general treasury, by which several managers took charge, supplying from it the needs of the community. All that was given was given to the common welfare, and the members gave away all their possessions when they joined the order, and there was among them no distinction of wealth or poverty. It is the apostles at Jerusalem at this time that "not one of them said that ought of the things which he possessed was his own; but they had all things in common."—John 13:35.

With great power the apostles testified to the resurrection of the Lord, and great grace God's free grace, was given to all. The love of the Christians was shown in the wonderful generosity of the Christian community; the need for assistance arose among the poor, those who had nothing but their bodies, and these brought the amount received to the apostles for them to distribute. "Laid aside were all kinds of contributions from the Orientals, coming, laying gifts at the feet of kings; if meant that the money was left in the apostles' control."

It is interesting to recall here what apostles wrote to the Emperor Hadrian about the Christians in those days: "They rescue the orphan from him who does him violence, and he who has given to him who has not, will not grudge. And thus the man among them is poor or needy and they have not abundance of necessities, they fast two or three days that they may supply the needy."—Sharing Responsibilities, Acts 6:1-7.

The last verse of Chapter V. tells us that the disciples ceased not to teach and to preach Jesus as the Christ, and learn that the result was the multiplying of the number of Christ's followers.

The apostles called a public meeting of the church and put the matter before the assembly, for them to neglect their work of preaching to look after the distribution of food to the needy—to serve the poor—and therefore they concluded that seven men be chosen, men of good report, full of the Spirit and of wisdom, who should be appointed for that work.

As Chrysostom observes, "It needed great piety to hear the words of the apostles."—For the word "diakonos" translated "serve" (serve, ladies, verse 2), comes or word "deacon"; and it is generally thought to be derived from the word "deos" for a special service office the later spring.

In Paul refers to deacons, and in 1 Tim. 3:8-13, he notes the qualifications necessary for this office.

As for the apostles, their time would then be free to continue steady work.

fidelity in prayer and carry on their work of preaching and teaching.

"The love of God is the greatest preparation and qualifies for the public life of ministry"—J. Stuart Holden.

"Rivers of vitality have their rise in souls that are on their knees before God."—J. H. Jewett.

## New Senators Appointed

Patrick Burns, of Calgary, Alberta, Named a Member of Upper Chamber

Patrick Burns, of Calgary, Alberta, well-known cattle man, has been appointed to the senate. Arthur Burns, K.C., Ponteix, Sask., has also been named a member of the Upper Chamber. Official announcement to this effect was made recently.

The new appointee from Alberta will succeed the late Senator P. E. Lessard, Edmonton, who died in April last. Saskatchewan's new senator will fill the vacancy caused by the death of Hon. J. G. Turiff last fall.

The party standing in the senate will now be Conservatives, 47; Liberals, 48.

The vacant seat in the Upper Chamber at present due to the death, slightly more than two months ago, of Senator G. G. Foster, Montreal. When this vacancy is filled, Conservatives and Liberals will have equal representation.

## Keeps Editors In Order

Unique Gavel Used By President At C.W.N.A. Convention

One of the most important items in evidence at the Canadian Weekly Newspapers' Association Convention in Regina, Saskatchewan, is the gavel used by President Malcolm Macbeth to keep the editors in order. It is made from the wood of old Fort Maiden, vintage about 1800 A.D., and is reminiscent of General Isaac Brock and Tecumseh, the famous Indian chief.

This gavel was presented to the association in 1930 by the Lake Erie and St. Clair Pugilists' Association. At that time Hugh Savage, of Dunnville, B.C., was president of the association, so the gavel was handed to him with the words, "From one savage to another."

The gavel is suitably decorated with a silver plate setting forth its antiquity and usages.

Introduced Amendment  
To Companies' Act

Bill Aims To Aid Employees In Purchasing Homes

Amending the Companies' Act so as to enable a company to make loans to its employees for the purpose of purchasing or building their own homes, even when such employees are shareholders of the company. Hon. C. H. Cahen, secretary of state, introduced a bill into the House of Commons. The bill received first reading.

The amending bill also permits the auditor of a company to be a director, when such company's bonds and shares are not offered for public subscription.

Aluminum is extensively used in making very small automobiles in order to lessen weight.

Standing on a concrete floor while using an electric iron is dangerous, for a shock may be transmitted if the concrete is damp.

## Another Notable Flight

## Captain Hawks Makes Remarkable Time In Eastern Canada Hop

Quebec, Montreal, Toronto and Ottawa have been drawn closer together by a series of sensational flying performances of Captain Frank M. Hawks, famous United States speed pilot.

Montreal is no more than 32 minutes from Ottawa; 48 minutes from Quebec, and 108 minutes from Toronto, while the capital and Toronto are only 70 minutes apart.

These were the times taken by Hawks and his monoplane in a flight from Quebec to Montreal, then on to Toronto, and back to Montreal via Ottawa. Several of these times were hailed as new records.

Hawks flew from Quebec to Montreal where he enjoyed breakfast, Ottawa as guest of Hon. Hanford took luncheon in Toronto, tea and was back in Montreal to be MacNider, United States minister of the Montreal Light Aeroplane Club at dinner.

After Captain Hawks was in the air four hours, 18 minutes and during an air distance of approximately 850 miles, averaging 197.6 miles per hour. The achievement rivals in some measure the notable recent flight of Captain Hawks from Paris to London, on to Berlin and back to Paris in a single day; also the flight that took him from London to Rome and back in a single day.

## Research Grants

## Westerners Receive Aid Under Banting Research Foundation

Among the scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

Prof. F. D. White, P. G. Mar, and Dr. R. H. Fraser, all of University of Manitoba, were awarded short-term grants.

Professor White is the assistant professor of bio-chemistry at the Medical College. Peter Mar has completed his second year in medicine, and Dr. Fraser is the lecturer in physiology and pharmacology. The research work which is being done by them covers the present summer only, and was begun shortly after the closing of the winter term at the medical college. Peter Mar is a graduate in science of the university, and has this qualification for research work.

Onion Diet For Sheep  
Sheep flocks on Colorado's western slope have been put on an onion diet to reduce last year's surplus. F. D. Warren, warehouse owner, said hundreds of sacks of onions have been no market for them.

Standing on a concrete floor while using an electric iron is dangerous, for a shock may be transmitted if the concrete is damp.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

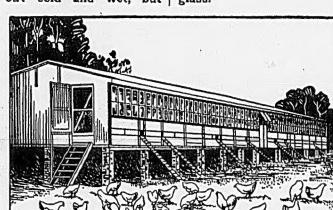

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1817 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 35 inches wide only.

Distributors: CHANTLER & CHANTLER LIMITED  
51 Wellington St. W.  
TORONTO, ONT.

USE  
WINDOLITE  
IN  
BROODER  
HOUSES  
LAYING PENS  
DAIRY BARNS  
SUNROOMS  
ETC.

## CARRY-OVER MENACE IS SEEN BY GRAIN TRADE

Ottawa, Ont.—Opinions of two elements most vitally concerned with the marketing of Canadian wheat were presented to the House of Commons committee of agriculture here, when James Richardson, of Winnipeg, Man., and Andrew Cairns, of Winnipeg, gave evidence on behalf of the grain trade and the wheat pool respectively. The committee has been vested with the task of enquiring into the better marketing of farm produce.

General world conditions were canvassed and a variety of reasons assigned to the present depressed state of wheat markets. The presence of a 200,000,000-bushel carry-over on the North American continent this year was a factor which continued to threaten the situation, Mr. Richardson declared, and to this would be added a surplus estimated for the present year among the wheat-growing countries of another 200,000,000 bushels. In spite of this, however, Mr. Richardson was optimistic for the future.

"Our main problems today are economic," Mr. Richardson said, "but the policy of this continent during the last few years has accentuated our difficulties. We cannot escape the penalty of having allowed an undue surplus to accumulate on this continent."

Mr. Richardson was opposed to the establishment of a wheat board, whose powers would embrace the fixing and regulating of prices. He did not think that a bonus of five cents a bushel was a bad thing for the farmers.

Australia's position in the Orient had been secured through the Commonwealth's depreciated currency, he told the committee, and agreed that if Canada deprecitated the currency of this Dominion it would enable the farmer to sell more, to get more of that currency for his produce and enable him, at least, to pay his debts.

Mr. Cairns predicted a national catastrophe if there should be any flooding of the market this year with the current year's crop. A break of 10 or 12 cents in the fall would be calamitous. Speculative marketing being dead, someone would have to assume the responsibility of hedging the crop until it could be directed into consumptive channels.

He had found no resentment in Europe against the policy of the Canadian wheat pool, nor did he ascribe the desire of the European countries to be self-supporting to any such resentment. Rather it was a lesson taught them by the war that they should be self-supporting.

Mr. Cairns could not see much hope in the immediate future, although there were remote indications of things becoming brighter.

## Lindbergh To Visit Canada

### Plans To Stop At Ottawa On Way To The Orient

New York—Colonel Charles A. Lindbergh has stated that he and Mrs. Lindbergh planned to stop at Ottawa and some other Canadian points on their way to the Orient, but he had no plans for touring Canada preceding the visit to the Far East.

Steps will be made at Royal Canadian Mounted Police Stations in north-western Canada for fuel, but, aside from Ottawa, no Canadian cities will be visited, he said.

The day for the Ottawa visit is uncertain, Colonel Lindbergh said. It would be better known late this month or in August.

## Trade With U.S.

### Dominion Leads the World In Trade With Southern Neighbors

Washington—Canada led the world in trade with the United States during both imports and exports. The United States Department of Commerce announced Thursday, The Dominion took \$41,993,371 of United States goods and shipped to the United States \$24,100,517. This compares with \$39,143,471 of goods shipped to Canada in May, 1930, and \$37,390,573 of imports from Canada.

Total United States exports were \$23,827,300 in excess of imports.

### Assist Unemployed

Victoria, B.C.—Pending the commencement of unemployment relief works on a large scale in British Columbia, the provincial government has instructed government agents and provincial police in all outlying districts to give all persons who need food credit of 40 cents a day at local stores. The allowance will apply to women as well as men.

W. N. U. 1898

## Approve Tariff Board

### Term Of Office Is Fixed For a Period Of Ten Years

Ottawa, Ont.—After a rough passage and much bickering, the government bill providing for the appointment of a tariff board finally passed the committee stage in the House of Commons. It now stands for third reading which, in the majority of cases, is merely a formality. It is possible that members of the Liberal opposition will seize the opportunity offered by the motion for third reading to voice briefly once again the many objections which they have developed. Discussion, however, must now be limited.

The bill, in brief, provides for the appointment of a board of three members, of which one is to be chairman, with the powers of a court of record. Its function, as indicated by the prime minister, will be to "find facts" upon which tariff duties may be based. It will endeavor to determine the cost of production of goods in foreign countries, the cost of producing similar commodities in Canada, and the rates of duties necessary to equalize costs. Its findings shall be reported to the Minister of Finance.

Salaries are placed at \$12,000 for the chairman and \$10,000 for each member of the board, and the term of office is fixed at ten years. In addition to its purely tariff activities, the board is empowered to perform certain functions under the Commodity Investigation Act. It also assumes the duties now attaching to the board of customs.

## Medals For Bravery

### Four Young Brazilians Receive Recognition From Royal Canadian Humane Society

Hanover, Ont.—Bronze medals for bravery have been awarded to four young men of Rio De Janeiro, Brazil, by the Royal Canadian Humane Society.

The four, cited for their heroism March 27, 1931, in rescuing three North American visitors from drowning at Copacabana Beach, are Archduke Pinto Amando, Jorge Pinto Amado, Edilson Lima Coelho and Roberto Dolabela.

The rescue occurred at the beach when three members of the Canadian trade mission to Brazil, and a friend from the United States, went swimming there. They were carried out shore by the heavy surf and the undertow when the young Brazilians with their assistance.

One of the men rescued, C. E. Marley, London, Ont., failed to respond to attempts at resuscitation, but the three others, Arthur W. White, London; Thomas H. Ramsey, Edmonton; and W. F. Routh, United States friend of the party, survived.

Mr. Cairns predicted a national catastrophe if there should be any flooding of the market this year with the current year's crop. A break of 10 or 12 cents in the fall would be calamitous. Speculative marketing being dead, someone would have to assume the responsibility of hedging the crop until it could be directed into consumptive channels.

He had found no resentment in Europe against the policy of the Canadian wheat pool, nor did he ascribe the desire of the European countries to be self-supporting to any such resentment. Rather it was a lesson taught them by the war that they should be self-supporting.

Mr. Cairns could not see much hope in the immediate future, although there were remote indications of things becoming brighter.

## Must Keep Expenses Down

### Germany Has Been Warned To Practice the Right Economy

Berlin, Germany.—The German Government pledged its word that the money made available by the Hoover debt plan will be used solely for the purpose of bringing about consolidation of the nation's finances. "Whatever alleviation the credit and money market receives, must rebound to the benefit of Germany's business and economy," the government said in an official proclamation.

The nation was warned in the government statement that it must be unremitting in its efforts to economize. No increase in the expenditures of any government department will be tolerated. President Paul von Hindenburg sent a message to President Hoover, telling of the gratitude of the German people.

## Reduce Insurance Rates

### Reduction On Shipping Via Hudson Bay Route Is Reported

Regina, Sask.—The British hull commission has agreed to reduce insurance rates on shipping via the Hudson Bay route from 4 per cent. to 3½ per cent. on vessels valued at £10 per ton, according to official word from London, received by the Saskatchewan government.

This reduction was made contingent upon the operation by the government of ice breakers and direction finding equipment.

The committee also agrees to extend the sailing limit to October 7 of each year for a 10 per cent. increase on the above rates, and to October 15 for a 25 per cent. increase on the same rates.

## Trade Treaty Delayed

Ottawa, Ont.—The new Canada-Australia trade agreement bearing the signatures of Australian representatives, has not yet reached Ottawa. At the request of the Australian government arrangement has been made for simultaneous release in Canada and Australia.

## No Armaments

### Germany Will Not Use Reparation Funds For War Purposes

Paris, France.—The German government, through Ambassador Von Hoechst, gave Premier Laval its solemn word that it would not use the funds realized by the reparations moratorium for building armaments. Ambassador Von Hoechst gave to the premier the text of Chancellor Brunnen's statement of July 2, in which the chancellor assured the United States government that its moratorium benefits would be used for economic purposes.

After the interview, Premier Laval issued a statement in which he said that the German government made the move on its own initiative.

Paris began to prepare for the disarmament talks which it expects after the arrival here of United States' Secretary of State Henry L. Stimson.

## National Relief Board

### Social Service Council Of Canada Will Urge Formation

Toronto, Ont.—Appointment at once of a small national board or committee, composed of the best informed and most capable persons available, to plan, co-ordinate, and direct unemployment relief measures, is urged by the Social Service Council of Canada in a memorandum of resolutions passed by that body, to be submitted to Premier R. B. Bennett and Hon. Gideon Robertson, Minister of Labor.

Rev. Canon C. W. Vernon, of Toronto, president of the council, and Dr. J. Phillips Jones, general secretary, expect to go to Ottawa shortly to present the resolutions to the government.

## TAKE STEPS TO ENSURE SEED FOR DRIED-OUT AREAS

Ottawa, Ont.—The government has for some time had under consideration steps to ensure that the areas in the west facing short crops would not be denuded of the grain already stored there. The Saskatchewan wheat pool delegates in Regina decided to urge the government to purchase and retain all grain in the dried out areas until the feed and seed requirements can be assured.

There need be no fear in this regard, Hon. Robert Weir, Minister of Agriculture, said in an interview recently. The areas referred to would be protected as to the removal of grain. The government had been giving the situation close consideration for some time.

## Trade Conditions In Britain Are Improving

### Situation Better Than In States Says Sir Charles Gordon

Quebec, Que.—Noting an improvement generally in conditions in Great Britain, with a trade revival taking place, Sir Charles Gordon, president of the Bank of Montreal, has returned to Canada from a brief visit to Europe.

"I think that conditions in Great Britain are improving, trade generally experiencing a revival, and that conditions there aren't as bad as in the United States," said Sir Charles.

## DADDY DOES THE TRICK

In all the millions that followed the progress of Wiley Post and Harold Gatty, who flew around the world in nine days, none were more intimately interested than the group presented above. Mrs. Harold Gatty, wife of the flier, with her children, Alan, five years old; Lindsay, three, and Ronald, who is nearly two. They were confident "Daddy" would get back home in "Winnie Mae" after the strenuous flight.

## Premier MacDonald

### Labor Government Triumphs Over Recalcitrant Leftwingers

London, England.—The government had an easy triumph in the House of Commons over recalcitrant leftwingers who moved the rejection of the unemployment insurance anomalies bill, which aims to remove some of the unsatisfactory features existing in unemployment insurance.

The left wing, led by James Maxton, objected that the bill was wholly inadequate, but after some hours debate they failed to convince the House and the rejection motion was defeated 231 to 19.

The minority included the followers of Sir Oswald Mosley, who moved from the Labor side of the House to the opposition side. The Conservatives did not vote and several Laborites and Liberals also abstained.

## Had Easy Victory

### Labor Government Triumphs Over Recalcitrant Leftwingers

London, England.—The government had an easy triumph in the House of Commons over recalcitrant leftwingers who moved the rejection of the unemployment insurance anomalies bill, which aims to remove some of the unsatisfactory features existing in unemployment insurance.

The left wing, led by James Maxton, objected that the bill was wholly inadequate, but after some hours debate they failed to convince the House and the rejection motion was defeated 231 to 19.

The minority included the followers of Sir Oswald Mosley, who moved from the Labor side of the House to the opposition side. The Conservatives did not vote and several Laborites and Liberals also abstained.

## TARIFF BOARD BILL IS APPROVED BY COMMONS

Ottawa, Ont.—The amendment of Rt. Hon. Mackenzie King, moved on third reading of the bill to create a tariff board, was defeated in the House of Commons by 34 votes.

The vote stood: For the amendment, 51; against, 85.

As soon as the result of the division was declared, Hon. Ernest Lapointe, former minister of justice, moved the six months' hold to the bill. This motion was declared lost without a registered vote.

The bill then received third reading.

Ottawa, Ont.—Liberal and Conservative leaders clashed once more on the old battleground of tariff principles. Asserting that the tariff policy of the government, as exemplified in changes of duty provided for in the budget, would bring about a condition of stagnation in Canada's trade, Rt. Hon. Mackenzie King, opposition leader, criticized the government proposals.

This was not a time for experiments, warned the Liberal leader. The trend of the world today was in the direction of lower tariffs; high tariffs had been tried and found wanting, and reductions were turning back to moderate duties.

Canada was confronted with an extremely grave situation, retorted Rt. Hon. R. B. Bennett, Prime Minister. Depressed conditions throughout the world were forcing nations to adopt extreme measures. Dumping of goods into an unprotected Canadian market might mean the extinction of industries of Canada engaged in the manufacture of those commodities. This the government proposed to prevent.

The House of Commons was engaged in consideration of the most contentious piece of legislation remaining on the order paper when Mr. Bennett and Mr. King spoke.

The customs tariff resolution, implementing approximately 200 changes in duties on imported goods, was under discussion. This resolution, the most important of those brought down in the budget, contains material for lengthy debate. The lateness of the session, however, may militate against long discussion.

The prime minister gave examples of the dumping practices which the government proposed to prohibit. A foreign manufacturer was attempting to introduce safety pins into the Canadian market. Consequently he sold a ring of 144 graduated safety pins for five cents. By so doing he threatened the life of a Montreal industry, also manufacturing safety pins, and employing 50 Canadians. Should the government stand by and see the Canadian firm destroyed, asked the prime minister.

The House, in committee of ways and means, finally got down to considering the various changes in duty provided for in the budget. The Australian treaty has not yet been brought down, and consequently a number of items affected by that act are standing over.

The first tariff item taken up provides a duty of 20 cents per bushel under the intermediate tariff on Indian corn, under the general tariff of the Indian corn, under the general tariff of the Indian corn, while it comes in free under the British preference.

Hon. J. L. Ralston (Lab., Shelburne-Yarmouth), led a series of protests against this impost. In the Maritime Provinces alone, approximately 700,000 bushels of corn were imported each year for use as poultry feed. Col. Ralston was supported by opposition members from British Columbia, who claimed that the poultry raising industry there required corn.

## Sympathy From Britain

### Expression Of Regret On Partial Crop Failure Heard In British House Of Commons

London, England.—"I am sure the House will greatly regret to hear the present drought is expected to have a very serious effect on crop prospects in the prairie provinces of Canada," said Rt. Hon. J. H. Thomas, secretary for the Dominions, referring in the House of Commons to the causes and probable economic effects of the failure of a large portion of the Canadian wheat crop.

Mr. Thomas continued: "As to the position generally, we can only refer to the statement made by the Prime Minister of Canada on July 1." Mr. Bennett's review in the House of Commons of the serious situation confronting the people of a large section of Saskatchewan and of smaller sections of Alberta and Manitoba, when he announced the Dominion government would take measures for relief.

## Capitalism An Admirable System

**Capitalism Not to Blame for Depression Says Sir Thomas White**

The statement that "capitalism is on its deathbed" is a favorite with Socialists, Communists and other kinds of gods. It has been repeated so often, without contradiction, that people who are not well-informed on financial and economic subjects may have come to believe that it has some foundation. Sir Thomas White therefore did a public service in declaring at the meeting of the International Association of Controllers and Accountants Officers that society as constituted in Canada and the United States offers the best possible way of human life if administered with sanity and judgment.

Sir Thomas admitted that capitalism is on trial because so many people question its advantages. "Nevertheless," he said, "the fault is not in the capitalistic, the individualist system. It is an admirable system. The fault is in ourselves." He went on to show that if people were extravagant, if credit became inflated, this misuse of the system would exact its penalty. The good, old-fashioned principles of thrift and economy would gradually correct the present depression as they had many earlier depressions. "Don't blame the system," he said. "Blame yourself."

No one can question the competence of Sir Thomas White to speak on this subject. His words will correct an impression which has gained some headway. They will help to reinforce confidence in the future.

Toronto Mail and Empire.

### Ready To Plunge Again

**Many People Waiting Opportunity To Play Stock Market**

We suspect that a large section of the public is waiting to take another round out of the stock market.

Human nature will never be cured of the idea that it can get something for nothing, and if the opportunity looks good enough will leave all else and cling unto a chance that two and two will make five.

The stock market was strong poison for thousands of Canadians two years ago, but readers will have noticed that what the market showed a gain of 100 points following the war debt adjustment news, the halls of the stock exchange commenced to fill once more with men who gazed wistfully at the changing figures on the board.

Let stocks advance 10 points and the rush to prove once more that two and two makes five will knock you down. — Regina (Evening) Leader-Post.

### Grain Exhibits

**Many Entries Received For Calgary Board of Trade Competition**

Over a thousand application and entry forms were mailed to farmers in the Calgary district for the annual Board of Trade standing grain and good farms competition this year, says J. H. Hanna, secretary of the Calgary Board of Trade. Last year about 50 farmers took part in the competitions and it is expected that a similar number will participate this year. The rules, regulations and prizes will be the same as in former years.

### Up To the Dominion

Premier S. F. Tolmie, commenting on the division of the Supreme Court of Canada in the radio reference repeated that the provincial government had already declared, that it believed the matter to be one largely for Dominion jurisdiction.

The world's largest coin, a plate of copper 10 inches square, issued by Frederick of Hesse Cassel in 1731, to represent the equivalent of \$3 was sold in London, England, recently for \$18.75.

The first women to use the new air service from Central Africa to Europe were Dr. Margaret Holliday and Mrs. H. R. H. Stone, who flew 5,000 miles from Kisumu to London.

"You are on the stock exchange. Tell me something that is sure to rise."

"The thermometer!" — Moustique, Charleroi.

W. N. U. 1898

### Hints For the Housewife

**What May Be Useful When Things Go Wrong In the Kitchen**

Too much salt often has spoiled the soup. A remedy for this is to add from half a cup to a whole cup of sliced raw potatoes to the sauce pan or soup. Let stand 10 or 15 minutes, remove potatoes and serve. The potatoes absorb the excess salt.

Delicately flavored vegetables such as asparagus and peas require very little salt, particularly when dressed with butter for serving. Use salt sparingly, for it's easy to add salt to individual needs.

If the mayonnaise separates, take another egg yolk in a fresh bowl and slowly beat in the curdled dressing, continuing as usual until all the lemon juice and oil is used.

If a custard sauce curdles, beat it well with a dower beater. This same beater often will beat the lumps out of a white sauce that has been made in too big a hurry. If the sauce is very lumpy it can be rubbed through a fine sieve and reheated.

A tomato cream soup that shows an inclination to curdle can be converted into a thick tomato puree by adding butter and flour rubbed together in the proportion of 1 tablespoon butter and 1 tablespoon flour to each cup of soup.

### B.C. Plans Reforestation.

**Artificial Planting Resorted To For First Time In Province**

Reforestation on a large scale is contemplated in B.C. The province has 8,500,000 acres in timber reserves, but in addition, is now investigating areas along the coast especially suitable to the reproduction of Douglas fir. While natural reforestation must be depended upon for the re-stocking of most logged-over lands, next year, for the first time in the history of the province, artificial planting will be resorted to.

Two of the areas likely to be selected lie about Harrison Lake and Powell Lake. The first embraces an area of some 500,000 acres between Harrison and Alouette lakes and the latter, which already contains some 300,000,000 feet of mature timber, and second growth, lies at the head of Powell Lake and embraces the upper watershed of Powell River and Lois River.

The extent to which re-stocking will be carried out is indicated by a statement that 800,000 seedling Douglas fir trees will be planted out in 1932 and the following year.

### Has Saved Many Lives

Captain Sir Arthur Rostron, commander of the Cunard Line, who retired recently after 36 years' service with the Cunard Steamship Company and 46 years as a sailor, has saved more lives than any other commanding officer afloat. It was he who, as commander of the "Carpathia" in 1912, steamed at full speed for 60 miles to the aid of the sinking "Titanic" and rescued more than 700 passengers. He is 62 years of age.

The old stenographer, who was leaving, was posting the new one on the characteristics of the boss. "You'll find Mr. Brown a man of few words," she said.

"Gee! I'm in luck!" thought the green stenographer. "I don't know very many."

The first formulas for baking powder were developed in the United States in 1850.

### Historic Landmark May Disappear

**Adelphi Terrace May Disappear In Modernizing of London**

Adelphi Terrace, long noted for its literary associations, and some of the adjacent property may disappear in the modernizing of London if the Adelphi estate is sold at auction this autumn.

This lovely and historic backwater of eighteenth century life will be demolished by none other than American visitors, most of whom include it in their London pilgrimage. But local property owners have sounded the alarm of the tiny street perched high above the Embankment Garden, overlooking the Thames.

Sir James Barrie still lives in the corner house on Adelphi Terrace, but his erstwhile neighbor, George Bernard Shaw, has moved to Whitehall Court. David Garnett lived in the centre house of the terrace within a few hundred yards of the scene of his stage triumphs, and there he died in 1979. It was here that Raleigh lived and young Dickens worked. It was here that the brothers Adam erected on the river front of Old Durham house, the finest architectural block in London. At numbers 6 and 7 the Savage Club has had its home for many years.

Beneath the terrace are the no less famous Adelphi arches, which also are doomed. When these arches were built by the Adam brothers in 1770, a new home will have to be found for the stocks of wine said to be the largest in the world now reposing in their dark cellars. Six great wine merchants keep their stocks in these barrels, any one of which can hold 60,000 dozen bottles of fine vintage carefully laid away.

Many bins represent the purchases of noted connoisseurs of wine whose stocks are kept there during the years they are undergoing the process of maturing. The time is not so very long ago when the river flowed right up to the arches and barges unloaded their wine cargoes there.

### Has Many Possibilities

**English Language Can Be Used In Various Ways**

The English language should be popular because one can do many things with it.

At a dinner given to Prof. A. H. Young of Trinity College in Hart House, Toronto, Colonel H. C. Osborne, a former president of the Royal Canadian Geographical Society, referred to his guest of honor, referred to him as a stickler for punctuality. On one occasion, said Colonel Osborne, a student, after frequent admissions for tardiness, was the first to appear for a lecture. He was commanded by Professor Young in these words:

"I see you are early of late. You used to be behind before. But now you are first at last."

### Not So Good

There is a man in our town, and he was wondrous wise. He swore by all the gods above him, but he would not advertise!

But one day he did break this rule, and hereby hangs a tale: The ad was set in real small type, and headed "Sheriff's Sale."

Toy balloons are used by coast artillery officers in determining wind conditions.

It isn't advertising that is costly. It is oblivion.

### A Mechanical Brain

**New Calculating Machine Thinks Quickly In Queer Way**

Invention of a mechanical brain whose grey matter is mostly light has been announced by the Massachusetts Institute of Technology.

The brain is a calculating machine, which makes use of light by trick almost as simple as the cutting out of paper dolls. It performs in a few minutes mathematical problems which by human brains and hands require anything from hours to days.

It analyses graphs by turning them into light. Graphs are lines showing averages. They are the lines which rise and fall, like a tracing of mountain peaks, to picture anything from a series of business receipts to the variations of good radio reception.

The paper is treated so that the pattern below the graph is transparent. The effect is like cutting out paper dolls outlined as openings in the original card.

### An Ancient Food

**Honey Used As Food Since the Dawn Of History**

Honey is one of the oldest foods of daily use. There is little doubt that our early ancestors discovered the honey tastes of bees turned pink and even learned to make bread.

The honey of antiquity was likely in the development of earlier man as good as that of today except that in breeding varieties of sweet corn, in breeding different flowers at that time gave it a higher sugar content in sweet corn, a flavor different from that of our corn and cantaloupes, in reducing the modern product.

Honey is unique in that it is the only unmanufactured sweet available, creating yields per acre, in breeding in commercial quantities. It contains "yellow" resistant varieties of celery and cabbage and in improving standard varieties of onion.

The average consumer today little appreciates the improvements made in most vegetables and green stuffs.

These, according to vegetable specialists, are made so slow that persons outside the experiment stations and agricultural colleges have been aware of changes in quality or growth characteristics.

The public's attention usually is called to developments in the truck gardening industry until some new pest or disease menaces the supply and retail prices are influenced thereby. Many new discoveries by scientists have gone unnoticed, the specialists assert, because they have not materially affected the consumer's pocketbook adversely.

The average consumer is more concerned over whether insects destroy crops or the drought reduces production than in any improvements which scientists may effect in varieties, in the opinion of horticulturists.

### Vegetables Are Being Improved By Science

**And Consuming Public Is Slow To Recognize Fact**

Slow as science progresses in the improvement of food commodities, it still is several jumps ahead of the consuming public, according to vegetable specialists at Michigan State College.

Most consumers still order "string beans" when they purchase fresh and canned vegetables, but in reality, the specialists assert, there no longer is such a commodity as string beans.

Plant breeders at Michigan State College and at various agricultural experiment stations have bred the "string" out of wax beans.

In breeding out the strings, the scientists have further improved the vegetable by breeding more "snap" into the pods. Vegetable specialists declare the proper name for string beans now is snap beans or wax beans. Freshly picked wax beans now readily snap in breaking, making it unnecessary to use a knife in preparing for the table.

Scientists also have improved other vegetables. Prof. Geo. Starr, while a member of Michigan State College, developed red beets which will not

### Importance Of New Route

**Shipments Via Hudson Bay Will Greatly Benefit Western Business**

Intimation is made that first shipments of wheat over the new Hudson Bay route will be made this fall. It is not proposed to begin shipments of other commodities until after first wheat shipments have been made.

The establishment of a route via Hudson Bay for the transport of Canadian wheat, cattle, and dairy products to the markets of Europe has been a possibility long anticipated by farmers and business interests of Western Canada. The objective which they sought might be summed up in the following illustrations:

From Vancouver to Saint John, the eastern seaport of New Brunswick, 3,366 miles, with an ocean voyage to Liverpool of 2,710 miles—a total of 6,076 miles. The Hudson Bay route provides a journey of 5,245 miles from Vancouver to Liverpool.

From Edmonton to Churchill is only 1,538 miles, but voyage from there to Liverpool is 2,936 miles.

The products of Western Canada now reach the British market either by way of the Great Lakes or by the Pacific ports and the Panama Canal. By the latter route the distance from Edmonton to Liverpool is 10,701 miles, but by the Hudson Bay route it is merely 4,574 miles.

The great importance of the new route from the point of view not only of the saving of time and the cutting of cost, but also from that of trade expansion, is expected to have outstanding effects upon the development of Western Canada.

### Ideal Automobile Insurance

**Would Have Higher Premium For Careless and Reckless Drivers**

No automobile insurance bill will be satisfactory unless it provides penalties in the way of higher rates for "careless" and "reckless" drivers. The records of the state of Massachusetts and others show that a very large proportion of the accidents are caused by experienced drivers—men who seem to be getting into trouble continually. An investigation in Illinois of the records of drivers involved in fatal accidents shows that every one of them had a previous accident record. Some had been involved in three or more previous accidents. There is a type of driver who just won't be careful. The way to curb these fellows is to make recklessness costly. They ought to be made to pay heavily for insurance.

### Mixed Farming In Manitoba

**Syndicate Has Purchased Land For United States Settlers**

Mixed farming on a large scale will follow the arrival in Manitoba during the summer of a number of farmers from Minnesota, North Dakota and Wisconsin under a colonization scheme sponsored by a Minneapolis syndicate.

The syndicate, through a Winnipeg agent, has purchased 30,000 acres of farmland in the Lakeview district, north of Portage la Prairie, about five miles northwest of Winnipeg, and is negotiating for another 30,000 acres in the province though its location has not been disclosed.

The vanguard of the United States settlers is expected to arrive in the Lakeview district soon.

### Looking for Business

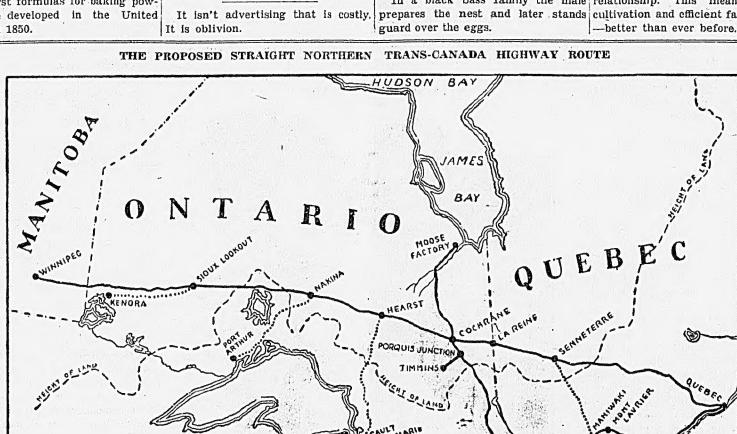

A notice in the Virginia Churchman reads:

"We have decided to reduce our charge for an obituary notice from .03 to .02 a word. We hope that this reduction will be the means of making this column used more by our church."

### Bridge Arch Forms Firm

Arizona's oldest farm is a five-acre piece forming the top of the arch of Goodfellow's natural bridge in the colorful district north of Roosevelt dam. The soil of the farm is good. The bridge is 180 feet high and has a wall to wall spread of 250 feet.

You can tell a polite man, he sits at a table and sips water while the vulgar table-pounder gets service.

The above map shows the transcontinental line of the Canadian National Railway from Quebec City to Winnipeg alongside which it is proposed to lay the Trans-Canada highway. Completed portions built as provincial highways run from Cochrane to Hearst in Ontario and Senneterre to La Reine in Quebec. The irregular line arising in Ungava depicts the height of land around Hudson Bay, along which many mining developments have been uncovered. It is claimed that the distance between Mont-

real or Ottawa and Winnipeg will be shorter by 200 miles, following this Northern straight route, when a Quebec feeder road from Maniwaki to Senneterre is completed. Its advocates urge that besides providing an all-year road for local and inter-provincial use, promoting agricultural settlement and development of unbelievable natural resources, it would make accessible to Canadian and United States tourists an enormous hinterland of unparalleled hunting and angling opportunities.

"Who crushed your silk hat like that?"  
"Pardon me, that is my wife's new hat!" — Nagels Lustige Welt, Berlin.

## Harsh, Gripping Purgatives Are Dangerous!

**ENO'S**  
"FRUIT SALT"

Cheap, harsh laxatives may prove very costly. Painful rectal trouble can be aggravated by the unwise gripping condition such cathartics cause.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water makes you feel toned up and strengthens the entire system. Acid stomach, fatigue, biliousness quickly disappear.

CHAPTER XXII—Continued.

Her eager groping for courage tore the old man's heart; but he answered with well-sustained cheer. "O course I do! Like as not they're safe and sound on some nice, cool lake with plenty o' coconuts to eat, and so much good food that Nick'll hate to see French come round after he gets back. I ain't a-goin' to let myself think they ain't safe, dearie, and you mustn't neither. Only" (and in spite of an heroic effort, his voice trembled), "only the wain'th powerful hard."

It was evening. The little boys were in bed, and Gay and Simeon were on the side porch, looking across the garden to the white pillars of Halliday's fine old house. Lights were on in the room that had been Angela's, and they could see him moving about, doubtless doing the inevitable last things before his departure early in the morning. When the room was dark again, Simeon stirred, and arose.

"Julie's out," he said. "Halliday told her to go 'cause she'll have to stick so close while he's away. He wants to see you, Gay, to say goodbye. He asked if I'd come over and set a while, so's not to leave little Martha all alone. You'll see him, won't you, dearie? He said if 'twould bother her he wouldn't come."

Gay hesitated. Since the news of the probable disaster she had seen no one save the Maxwells, and, much as she liked James Halliday, she shrank from talking with him. How could she offer sympathy to one whose wife had been, she felt sure, only a minute stone about his neck? What could she say? His was not a sorrow like her own.

Suddenly Gay drew a long breath. Halliday had stepped onto the porch and dropped into a chair, his face buried in his hands. Something in his desolate figure brought understanding. She saw things in a new light—a truer proportion. After all, his was the greater sorrow—not hers. She had her memories—he had only regrets. What Mary Maxwell's mature mind had grasped at once, Gay had to learn by groping and through suffering. Of course she would see James Halliday!

She looked up at Uncle Slim's ungainly figure, still hovering uncertainly at her side.

"If you don't feel just equal to it, dearie—" he hesitated, but Gay said:

"I do, Uncle Slim. I want Mr. Halliday to come. Tell him to come now."

"Well," said Simeon relievedly, "maybe it'll do him good to talk. He don't look well."

"You're very good to see me," said Halliday. He had drawn a chair close beside Gay's hammock, and had taken her hand. "I'll try not to tire you, but really, there's a good deal to talk."

She smiled, and felt suddenly an

immeasurable relief. The interview would not be hard.

"First about Martha," he went on. "In all probability this is an unnecessary precaution, but if anything happens to me—if by chance I don't come back (it's absurd to think of it, dear Mrs. Hastings, but I've had to consider everything this last week), I've made you her legal guardian. I'm not trying to put more burdens on your shoulders, but—I have no one to help me. My sister's too much of an invalid to take such a responsibility; and all I ask is that in case it is necessary you will find my little girl a suitable home—set that she's treated with kindness, and educated as you think best. There will be plenty of money, always, I won't tire you by going into details. I just wanted you to be prepared; though I'm sure I'll never have to ask the favor of you."

"It's not a favor. Nick saved little Martha's life, and I love her because of that. I'll promise you now, Mr. Halliday, that if ever she needs me I'll care for her as if she were my own. I shall have anyway, without the promise."

He gripped her hand.

"I know. You've been wonderful to her already—more of a mother than she's ever known, or ever will know. I'm eternally grateful. If ever I think I could do something for you..."

"But you're doing—everything! To know that you're searching for Nick—why?—it's all that I have to live for that hope! I've written a letter to you to take to him, Mr. Halliday. The writing of it eased my heart a little. If you don't find him you can bring it back to me—but but you won't leave a stone unturned, I am sure of that."

He smiled.

"I shant leave an island unexplored, if that's what you mean. Even to be sure of the truth—"

He paused, and Gay said breathlessly: "I know. It's the uncertainty that tears us, isn't it? Yet it's that which keeps us alive, too, I sha'n't let my hope die, Mr. Halliday; and my heart will be with you every minute. I understand just what you're suffering."

In the growing darkness she did not see that the blood mounted to his temples. For a moment he was silent; then, in his overwhelming need of sympathy, he said recklessly: "You don't. No one ever has—not ever will. I'm not sure that I'd want anyone to—even you. But if it helps you to know that you've been—well, a light in the dark to a lonely wayfarer, that your faith and character, and truth, have made over the world for him, why, you're welcome to the knowledge, dea girl. That's all. I shouldn't have said as much, but this last week—

He broke off abruptly; then, arose, and added almost savagely: "I'll find your husband, Gay. I'll never stop looking till I can bring you some word of him at least. Good-bye, No, don't get up. I like to think of you lying there in the starlight." He bent to her. "Give me your hands. May—may I kiss them? It's all I shall ever ask."

When he had gone, across the fragrant garden, it came to Gay with a sudden sense of shock, that not once had he spoken of his wife.

CHAPTER XXIII.

The hours of hurricane that followed Nick's sudden wakening were a nightmare that he could never remember without a shudder. It was evident that if the Sea Bird sank no lifeboat could live in the sea, and there was nothing to do but wait with fortitude the fate that seemed imminent. The storm had broken so suddenly and with such violence, that almost from the first blast their wireless had gone by the board. They could only put for the open sea, an attempt to land on the nearest island being an impossibility in the dark and storm.

CHAPTER XXIV.

The gross agricultural revenue of Canada in 1920 is estimated at \$1,240,170,000, of which Ontario accounts for \$421,342,000; Quebec \$263,200,000; Saskatchewan \$175,546,000; Alberta \$150,731,000; Manitoba \$88,677,000; British Columbia \$49,300,000; Nova Scotia \$37,823,000; New Brunswick \$34,214,000, and Prince Edward Island \$19,701,000.

It was a strange company that assembled in the cabin. Each wore his life preserver, which Nick thought grimly, would only prolong the agony a little, for if the boat went down there would be no possible hope for any of them. Amy Myer held little Marjorie in her arms, trying to calm the frightened child whose cries at last subsided into an occasional whisper that made Angela cringe with terror.

"Can't you stop her?" she kept saying, petulantly, unmindful of the fact that no one seemed to hear her. "Can't you stop her?" Yet when the child was silent her silence seemed more terrible to Nick than did her cries.

They sat huddled together, as if there were at least some comfort in close contact with humankind. To talk was impossible, even had anyone the desire to speak. When they did speak it was to shout. There was no chance for confidences—no opportunity to say, as some of them longed to say: "If you get back will you take this message?"

Nick envied the crew. They, at least, were fighting the elements. Their hands were occupied. His own felt strangely useless. Once he took Marjorie from Amy's weary arms, and despite her fear, the exhausted child slept there for a while, waking again to call frantically for her mother. It was a time of inaction and suspense that was to be forever a treacherous memory to them all. Nick found himself wishing that the end would come. It seemed inevitable—a certainty, and the waiting for the plunge into those dark waters was but the refinement of cruelty.

Marjorie seemed not dawn—merely a lifting of shadows. The hours dragged. At times, when the waters grew calmer for a moment, hope would arise, only to be dashed as the storm continued with fresh violence.

A second night set in. It seemed incredible that the boat still lived, that it had not been battered to pieces by such violence. Yet as the night advanced it seemed to Nick that the storm was undoubtedly subsiding. He was sure that the force of the wind was growing less. Hope rose, only to be quenched by a sudden racing of the engines. For a moment they all thought that the end had come. Marjorie, who had been fitfully asleep, cried out in terror, and then, up, her father went below. When he returned his white face had told him of some fresh calamity, had his lips been mute.

"It's the propeller shaft—broken—"

(To Be Continued.)

## THE RHYMING OPTIMIST

By Aline Michaels

### Faith's Flower

Of faith I sing, of faith leads  
Us always on to better deeds;  
Of faith that like a beacon glows  
And makes life lovely as a rose;

Of faith that to our souls is given  
So we may gain an earthly heaven.

Heaven's master clock for the world has a dial with numbers from 1 to 24. It is located exactly on longitude 0 degrees, 0 minutes, and 0 seconds. Here the maps of the world begin because all longitude is numbered east and west from Greenwich and all time bands are fixed with reference to the English observatory outside London. Eastern, Central, Mountain and Pacific times in the United States are adjusted with reference to the Greenwich master clock.

Through all Earth's dark and doubtful ways

By rock-strewn roads or forest maze,

Like a mother's guiding hand

Faith leads; why seek to understand?

The reason of the things that are?

In darkest night faith finds a star!

Faith brings a joy no man can gain

In reason's cold, severe domain;

And wise are we who tend faith's flower

That, in some 'storm-rent, cruel hour,

Grows up into a towering tree

With sheltering boughs for you, for me.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worms External.

Manitoba Gold

Famous for wheat, butter and bacon, Manitoba is also becoming a gold producer of considerable importance, the present output being estimated at the rate of \$2,500,000 annually. This is a substantial increase over production in previous years. Manitoba's gold output by months for the present year is as follows: January, 10,638; February, 9,238; March, 7,785; April, 8,267.

Gross Agricultural Revenue

The gross agricultural revenue of Canada in 1920 is estimated at \$1,240,170,000, of which Ontario accounts for \$421,342,000; Quebec \$263,200,000; Saskatchewan \$175,546,000; Alberta \$150,731,000; Manitoba \$88,677,000; British Columbia \$49,300,000; Nova Scotia \$37,823,000; New Brunswick \$34,214,000, and Prince Edward Island \$19,701,000.

## Vagaries In Time Methods

Speed of Modern Life Makes Second Hand More Important

Clocks and watches are changing their faces to keep up with a civilization that whisks onward to dizzy speeds. The United States, land of the split second, buys more and more clocks on which the second hand has grown from a silver to a pointer as large as the minute hand. Gaps used to punctuate the evening radio entertainment have disappeared because programmes are now scheduled on the second, says a National Geographic Society bulletin.

Trains listed to leave on the minute actually leave on the second. The world-wide reputation of an athlete may hang on a fraction of a second, a segment of time so small that a special timepiece, the stop watch, had to be invented to record it. But with one European refinement of time and clocks, America does not conform.

Trains leave on the continent can leave at 0:00 because the continental railroad schedule for most countries is now based upon twenty-four hours a day instead of twelve hours A.M. and twelve hours P.M. By international agreement a train that arrives at midnight, leaves at 24:00; also by agreement a train that leaves at midnight, leaves at 0:00. Some clocks in railroad stations show numerals one to twenty-four; others have numerals thirteen to twenty-four within ring one to twenty-four. England has gone over to continental railroad time.

Hours as recorded by modern time-pieces are a relatively recent invention. Martin Luther would find our clocks decidedly queer. Napoleon's instinct for order would be gratified to know that the hour had at last been standardized at sixty minutes.

In Paris, until 1819, the hour was a variable unit of time lengthening in summer time, shortening during the winter days. It was the Paris equivalent of our daylight saving system; six o'clock came when dawn arrived. In Nurnberg and parts of Central Europe another system was used down to 1809. At the time of the equinoxes day and night were divided into twelve hours equally; day time beginning at dawn, not midnight; night beginning at sundown, not noon. But as winter came on and the days grew shorter the hours allotted to day were cut off so that, in December, night hours were numbered one to sixteen; day, one to eight. The result was true in summer. A date in the year was often referred to as to the time when the day has begun hours.

Greenwich's master clock for the world has a dial with numbers from 1 to 24. It is located exactly on longitude 0 degrees, 0 minutes, and 0 seconds. Here the maps of the world begin because all longitude is numbered east and west from Greenwich and all time bands are fixed with reference to the English observatory outside London.

At the same time the third com-

## The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

**The Chinook Advance**

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show that they are written by the publication, in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in The Advance are—display, 40¢ per line; first and second page, 50¢ each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10¢ per count line. Legal advertising, 15¢ per count line for first week and 10¢ for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

**Heard Around Town**

Carl Grupp is visiting at the home of his uncle, John Rosenau.

Mrs. A. V. Youell, who has been in Calgary for some time past, is at home this week.

Mrs. Gingles and daughter, Miss Bertha, left this week for Edmonton to spend their vacation.

Earl Robinson, who had his tonsils removed last week, is recovering and is able to be out again.

Maxine Hurley is visiting for a time with Mr. and Mrs. W. Steckle at Calgary and also took in the stampede.

Miss Madeline Otto, who has been attending Business College at Calgary for the past year, returned to her home here Sunday.

Mr. and Mrs. S. L. Campbell, of Fox Valley, Sask., arrived in Chinook Monday to visit with the latter's sister, Mrs. A. V. Youell.

Mrs. J. Long and little son, Gordon, of Cereal, visited at the home of her parents, Mr. and Mrs. A. E. Roberts Tuesday afternoon.

Miss Isabel Matheson, of Gra num, has received the appointment for the grades which Miss Godkin taught in the school last term.

Services at the United church next Sunday has been cancelled on account of the pastor being in attendance at the boys' annual camp.

Rev. and Mrs. Frank Torpey has moved from Cereal to Lethbridge, Sask., where Rev. Torpey has been appointed pastor of the Anglican church.

Born—to Mr. and Mrs. Brad win Papworth, in Calgary, July 1, a daughter. Mrs. Papworth was before her marriage, Miss Myrtle Long, of Cereal.

Mrs. Fred Lajive and little daughter, Maxine, returned to her home last week. Mrs. Lajive has been teaching school near Sibbald for the past year.

Miss Mae Peterson, proprietor of the Beauty Parlor, who has been on a two weeks vacation, visiting with relatives at Drumheller and also took in the Stampede at Calgary, returned home Sunday.

Miss Faye Robinson, who has been teaching at the Rosemary Consolidated school for the past two years, has been appointed by the Chinook school board primary teacher for the coming year. Miss Robinson has been highly recommended by the inspector.

Mr. and Mrs. L. Ford and family, of Los Angeles, California, who visited with the former's brother, H. Ford, for about two weeks, left on Sunday for Edmonton, where they will visit relatives. While here Mrs. Ford and family held revival meetings in United church.

Miss Mae Todd is attending summer school at Edmonton.

Miss Mildred Milligan is learning to run the telephone at the drug store. This morning, starting at 3 o'clock, another good shower of rain fell over the district. Every little bit will help out at this trying season.

Hilliard Fisher, who is now living in Saskatchewan, has been renewing acquaintance in Chinook during the past week.

A delegation from the three municipalities, Colholtine, South Creek and Richdale, met at Youngstown on Tuesday. The object of the meeting was to consider whether they would apply to the government for road construction work for relief. However nothing was decided.

Miss Melva Richardson was united in marriage to Mr. Stanley Welty, of Stettler, on June 10 at Camrose, Alta. Miss Richardson is a sister of Mrs. Fred Lajive, and is well known in this district, as she lived for some years north of town and attended high school at Chinook. They will reside at Stettler.

Mr. and Mrs. L. S. Dawson and family, accompanied by Mr. and Mrs. P. Peterson and Jack Connell, started on a motor trip north for their holidays yesterday morning. Mrs. Dawson and family will visit with friends near Edmonton, while Jack Connell will visit with friends in the city. Mr. Dawson and Mr. and Mrs. Peterson will proceed on an investigation trip through the Peace River district, with the object of looking over home steads.

The boys' annual camp opened at Gooseberry Lake this week and all are ready and anxious to enjoy the summer outing. The contingent from Chinook this year are Lorne Rideout, Chester Rideout, Billy Youell, Jack Lee, Wesley Gilbertson, Vincent Rideout, Harmon Vanhook and Leonard Youell and will be under the care of Rev. Woollett. R. D. Vanhook loaded the boys and their outfit onto his truck and took them to the lake Wednesday afternoon.

Behind the stellar pitching of Horne the home boys took the Oyen-Cereal combined team by the score of 4-3, at the Sibbald sports on Wednesday. Johnston pitched well for the losers, but his wildness and telegraphing of his curves enabled the home boys to earn their margin of victory. The final game between Sibbald and Chinook looked bad in the firstinning, as they gained a three run advantage, but Chinook climbed back with four runs in the fourth. A total of four errors is all the home boys could be credited with in both games, which is A1 fielding. Horne allowed only 3 hits in both games and was given good support.

**America's Best Southdown Ram Was Born In 1923**

Chapman "28", Now Eight Years Old, Was Bred by the Late J. G. Chapman, Prominent Southwold Breeder.

On the farm of the late J. G. Chapman, now run by his son, James, brother of M. L. Chapman of Chinook, K.R., No. 6, St. Thomas, Concession B in South wold township, Ontario, was born in 1923, a ram lamb that has attained fame on the American continent as a show ram and breeding ram during the eight years of its life to date, and which has gained the distinction of being the leading Southdown ram in America. This information is contained in an article written by W. L. Hennings of the University of Wisconsin, published in the April edition of the Breeder's Gazette, of Spencer, Indiana.

The ram is known by its original name, Chapman "28". It is living on the Mountain Farm of Oscar Belden and Sons, of Bradstreet, Mass., who purchased him from Col. Robert McEwen and Sons, prominent breeders of Southdowns in Ontario, in 1924, following the Eastern States Exposition where he was shown as first prize yearling ram and champion.

Chapman "28" was the son of one of the late Mr. Chapman's own ewes, Chapman "139", which was

bred to the ram Larkin Farm "523" in 1920. He has during his lengthy career made a remarkable showing as a prize winner and champion of many exhibitions.

Possibly the most remarkable characteristic of him is that he has been able, in his progeny, to transmit his good qualities to his offspring. His own showing record reveals that he was first prize yearling and champion of the Eastern States in 1924 and fifth prize yearling at the International. In 1925 he was first prize two year old and again champion at the Eastern States Exposition and was first prize aged ram and champion at the 1925 International. At the present time he is suffering from stiff shoulders.

The breeding of Chapman "28" was not just a chance one. The late J. G. Chapman started breeding Southdowns thirty five years ago and carried on a program of selective breeding down through the years until his death in 1927. His wife, who is still living on the beautiful farm not far north of St. Thomas, took an active interest in the work and has always been fond of sheep. Though she is not active now, she enjoys the knowledge that her son, James, is carrying on the work his father began.

At the present time on the Chapman farm there is a flock of fifty six Southdown thoroughbreds, amongst which are several show lambs of good promise. In particular is one bred of Chapman "263" to the sire Alderham "385". It was born on March 1 and its name is Chapman "373". James Chapman is also carrying on another branch of breeding begun by his father, that of producing thoroughbred Durham cattle. A fine herd of these animals is living on the farm at the present time.—St. Thomas (Out) Times Journal.

**Minister Marks Papers, Forgets Wedding Service**

A new edition of "Waiting at the church" came into being at Winnipeg last week—with both bride and bridegroom on hand. The inextricably inclined couple were on hand bright and early at St. John's Cathedral, but the minister was missing. Phone calls deduced that Dean J. W. Matheson had forgotten his engagement and was marking examination papers at the university. The wedding was then slated for next day.

**RESTAURANTS ON WHEELS**

Strange as it may seem, good housekeeping is one of the prime essentials of modern railroading. Mr. Traveller has become so used to strolling through the train in the evenings, that he makes it a way of travel for himself, as well as for Mrs. Traveller and all the little Travellers, that he hardly gives a thought to how he gets his food. He travels while whirling along at 60 miles an hour. The answer lies with about 1,200 highly trained employees of the Canadian Pacific Railway, serving in some 150 dining cars, ranging from Atlantic to Pacific, and with an organization in stores and farms throughout the country, which provides the food and keeps the chefs' cupboards and refrigerators.

The average number of meals served in a year is approximately 2,000,000. As to quantities, suffice to say that the men eat nearly 500,000 lbs. of various meats; 1,000,000 lbs. of tea and coffee and some 40,000 quarts of milk and cream. The meals are served in being served in a typical C.P.R. dinner and types of the staff of chefs and waiters employed in the service.

**Colholtine Collections**

(Too late for last week) During the past two weeks the district has received a number of good showers. The crops are greatly improved, although it is doubtful whether or not there will be any fair yield.

Next Saturday, July 11, a U.F.A. picnic will be held in the Park one grove, one and a half miles east of Colholtine school and half mile south. Delegates from the Cereal convention will give a report. N. D. Stewart, Wheat Pool delegate, will also address the meeting, as will N. F. Marcy, who was nominated to run as Wheat Pool delegate. There will be softball and horseshoe throwing.

Miss Jessie Seaman, of Calgary, is visiting at the home of Mr. and Mrs. W. Wilson for the summer holidays.

On June 30 a ball team from Cloverleaf journeyed to Canada to compete in the ball games, but were unsuccessful in bringing home any honors. They were defeated by Keystone by a safe score.

Ewart Duncan has discarded his crutches and is now hobbling about. You would be surprised to see how much he can do in his disabled condition.

Last Tuesday, July 7, the Colholtine Sunday school picnic was held with the Youngstown S.S. at the farm of G. Good, north of Youngstown. The trees about the farm afforded a splendid place for a picnic. About 200 people attended and all report a very enjoyable time. During the day a number of softball games were played, in which Colholtine won three and helped win a fourth.

In the first game between Colholtine seniors and Youngstown seniors it appeared at first as if it would be a walkaway for Youngstown, as the score stood 6 to 1 in their favor at the first of the last inning, but unfortunately for them six runs were made by Colholtine, giving them the decision. Batteries—Colholtine, A. Spreeman and E. Duncan; Youngstown, I. Elliot and C. Boles; referee, E. Gardner.

In the second game, between the Colholtine and Youngstown girls (seniors), Colholtine won the game, as the score stood 18 to 10 at the end of the last inning. Batteries—Colholtine, Anna Morrison and E. Whitt; Youngstown,

Katie Shott and R. Campbell; referee, W. Morrison.

In the game between the juniors the Colholtine team defeated that of Youngstown-Hemaruka, by a safe score.

The last game held in the evening was the most interesting of all. This was played between two picked teams, Colholtine-Youngstown vs. Scofield-Hemaruka. As before the Scofielders took a lead right at the start, getting 10 runs to their opponents'. However, in the ninth inning the ball was started rolling by Leo Stre, who made a home run. From then on the score stood even. At the end of the ninth the score stood 16 to 15 in favor of Youngstown-Colholtine. Batteries—Youngstown, Colholtine, A. Spreeman and L. Stre; Scofield-Hemaruka, D. Foe and Defoe; referee, E. Duncan. A lunch was served at 6 o'clock and the picnic broke up at 7:30.

Miss R. Campbell is back home for the holidays, after being away to school for the past year.

Murdock McPherson and his sisters, Alexandra and Eva, are home for the summer holidays.

Mr. and Mrs. Wm. Vaubeberg were Youngstown visitors this week.

**Small Advertisements**

Advertisements under this heading are accepted at a rate of 50¢ for 25 words or less per week, with 10¢ for each additional 5 words. Three weeks for the price of two.
